Year 4 ICT

This term our ICT is using the programme Turtle Logo to create and debug algorithms to draw shapes, use different colours, produce text and draw arcs.

I would like you (if you have access to a computer and internet) to go onto the Turtle Academy website (www.turtleacademy.com) and select the 'lessons' option at the top. At your own speed you can work your way through the lessons. You may have used this before but it's a good idea to start at lesson 1 to remind yourself of the commands.

Have fun making algorithms and when we come back to school we will see how far you have managed to get!

Good luck!
